

FORM RELEASE

DESCRIPTION

FORM RELEASE is an oil-based form release agent specifically formulated for application to timber and steel formwork.

ADVANTAGES

- Economical
- Clean Release
- Solvent Free
- Easy application

APPLICATION

All formwork surfaces must be free of mortar, grease or other contamination which may affect the concrete appearance.

FORM RELEASE is suitable for use straight out of the drum without mixing.

Apply the FORM RELEASE to the formwork using a brush, roller, or spray at the rate of 8 - 10 m² per litre.

Avoid an excess of FORM RELEASE on the surface to prevent a dusty or stained finish.

CLEAN UP

Clean all equipment immediately after use.

Coat tools and forms with FORM RELEASE before storage to protect against corrosion.

FIRST AID & SAFETY

Refer to Material Safety Data sheet.

PACKS

20L, 200L, 1,000L

FORM RELEASE PDS Dec 2020

This Product Data Sheet (PDS) summarises our best knowledge of the product, including how to use and apply the product based on the information available at the time. You should read this PDS carefully and consider the information in the context of how the product will be used, including in conjunction with any other product and the type of surfaces to, and the manner in which, the product will be applied. Our responsibility for products sold is subject to our standard terms and conditions of sale. Chemical House does not accept any liability either directly or indirectly for any losses suffered in connection with the use or application of the product whether in accordance with any advice, specification, recommendation, or information given by it.
