

STUFF OFF

DESCRIPTION

STUFF OFF is a mixture of natural compounds, produced by a fermentation process and selected surfactants designed to remove the concrete, cement smear and oils & greases.

Does NOT contain mineral acids like hydrochloric, sulphuric, phosphoric, hydrofluoric acids, or the following organic acids, acetic, citric, formic and is NOT considered corrosive.

STUFF OFF will also act as a degreaser at the same time as removing concrete.

- NOT CORROSIVE
- CLEANS TOOLS & MACHINERY
- NOT TOXIC or DANGEROUS
- BIODEGRADABLE
- TRADES FRIENDLY
- CONCENTRATED

DIRECTIONS

For severe or heavy deposits, use as supplied and soak the surface or equipment for 2-4 hours.

Can be diluted up to 1+4 for lighter deposits.

Apply with a spray, rag or mop ensuring all deposits receive a liberal wash.

Allow to work and rinse with clean water.

Any spills should be neutralized with sodium bicarbonate, or soda ash, and then thoroughly washed down with water.

STUFF OFF is effective, giving a similar outcome to Hydrochloric Acid yet it is NOT dangerous or toxic, so OH&S issues are reduced.

FIRST AID & SAFETY

Refer to Material Safety Data Sheet.

STORAGE

Store in a cool place.

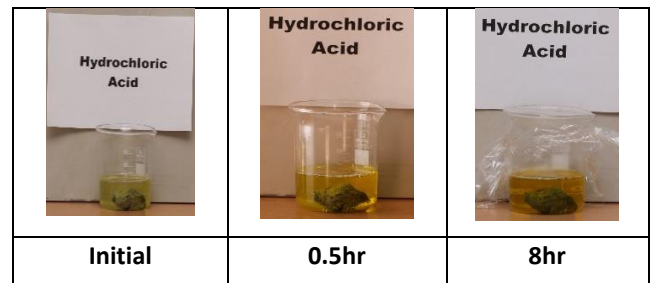

PACKS

5L, 20L, 200L

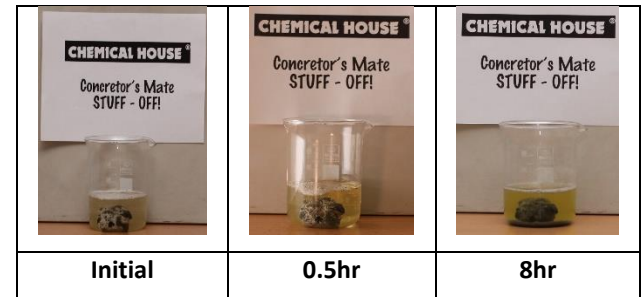

Pictures displayed (Figure 1) show well cured (>5 years) concrete being degraded with Hydrochloric Acid & the second series is "STUFF OFF"
