

PRODUCT:

BLUE FRESH DISINFECTANT

DESCRIPTION:

BLUE FRESH DISINFECTANT is a unique blend of disinfectants, deodorants, odour absorbers and surfactants. BLUE FRESH DISINFECTANT results in a 4-way action; disinfection, deodorising, cleaning and reodourising. BLUE FRESH can be used in bathrooms, showers, toilets, benches when diluted as per directions.

DIRECTIONS FOR USE :

Use 100ml per 10L hot water for use as a general-purpose mopping or wiping solution. For use in shower recesses dilute 1+9 for a residual antimould effect. For heavily soiled areas use at dilutions of 1L -2L per 10L to gain disinfection.

FIRST AID:

If poisoning occurs, contact a doctor or Poisons Information Centre. If in eyes, hold eyes open, flood with water for at least 15 minutes and see a doctor.

STORAGE:

Store away from other chemicals and food. Do not mix with other chemicals. Any spills should be adsorbed with sand or soil, recovered into a drum, then the area thoroughly washed down with water. Concentrated product is hazardous to marine and aquatic life, however if diluted by >100 times is biodegradable. Dispose recovered material in compliance with local government by-laws.
